

Editorial

It is a privilege to welcome Vincent Rotello as the new Editor-in-Chief of *Bioconjugate Chemistry*. Vince has an outstanding record in the biological applications of nanoparticles, and we look forward to his taking the journal in new directions. As we close our tenure, the authors of manuscripts submitted to the journal are uppermost in memory. The science of bioconjugate chemistry attracts people who are motivated to solve complex practical problems, and working with them has always been interesting. The published results are just the tip of the iceberg, as many authors, editors, and reviewers will agree. We are proud of the body of work communicated by the journal, and grateful to its authors for the effort required.

It is extremely important to honor the longstanding contributions of Senior Editors Paul Miller and Peter Senter and Associate Editors Ferenc Hudecz and Masayuki Yokoyama in making *Bioconjugate Chemistry* what it is today. It is difficult to imagine the journal without their involvement. Ann Meares, the Journal Office Administrator, has always been the central person who sorted through a mountain of words and deadlines and kept us all—editors, authors, and reviewers—on track. Likewise, the ACS staff members responsible for the composition and production of the journal and for helping authors submit their manuscripts have been so reliable that those outside the process may not realize how essential their daily contributions are. We offer heartfelt thanks, and we will miss working with them all.

The members of the 2013 Editorial Advisory Board have provided advice on many occasions, and we acknowledge Jacqueline K. Barton, Jean-Paul Behr, Santanu Bhattacharya, Marcel P. Bruchez, Chien-Hsing Ken Chang, Xiaoyuan (Shawn) Chen, Patrick Couvreur, Philip E. Dawson, Peter B. Dervan, Shiroh Futaki, Sanjiv Sam Gambhir, David A. Goodwin, Anna Grandas, Anne Gruaz-Guyon, Ned D. Heindel, Wim E. Hennink, Greg T. Hermanson, Jari Hovinen, Barbara Imperiali, Kenneth A. Jacobson, Lee Josephson, Rudy Juliano, Kazunori Kataoka, Thomas Kissel, Hisataka Kobayashi, Kenji Kono, Jindrich Kopecek, Robert Langer, Christopher P. Leamon, Shuang Liu, Harri O. Lönnberg, Heather D. Maynard, Thomas J. Meade, Igor L. Medintz, Oleg Melnyk, Dario Neri, Peter E. Nielsen, William M. Pardridge, Jong-Sang Park, Soledad Penades, Suzie Pun, Tariq Rana, Theresa M. Reineke, Ute Resch-Genger, Steve Roffler, Molly S. Shoichet, Francis C. Szoka, Jr., Maryam Tabrizian, Ganesan Vaidyanathan, Geralda Van Tilborg, Ralph Weissleder, D. Scott Wilbur, Karen L. Wooley, Anna Wu, and Gang Zheng for their help in shaping the journal.

Finally, it is a pleasure to thank the reviewers of manuscripts submitted in 2013 for their evaluations and recommendations. The scientific community depends on the selfless assistance of its members to maintain the quality and vitality of peer review. We enthusiastically recognize the service of the 2013 reviewers:
